

Fidelity Funds - Emerging Europe, Middle East and Africa Fund

富達基金 - 新興「歐非中東」基金

A
Standard & Poor's
Fund Management Rating[†]
標準普爾基金評鑑

For Fidelity Funds, please note:

- Fidelity Funds is an umbrella fund with sub-funds investing in equities, debt, money market securities and/or other instruments, including derivatives.
- Investors may suffer substantial loss of their investments in the funds.
- The funds may be subject to the risks of investing in emerging markets which may be more volatile.
- The funds may be subject to concentration risks of investing in a single or in a limited number of market(s) or sector(s).
- The funds may invest in non-investment grade bonds which may be more volatile and subject to greater credit and liquidity risks.
- The funds can invest in derivative instruments and / or structured products which may involve additional risks. Some derivative instruments and structured products may employ leverage which may cause greater volatility.
- Investor should not invest in the funds solely based on the information provided in this document and should read the prospectus (including potential risks involved) for details.
- The investment decision is yours. Before you decide to invest, you should make sure the intermediary has explained to you that the funds are suitable to you.

有關富達基金，請注意：

- 富達基金是一項傘子基金，涵蓋多項子基金。此等子基金可投資於股票、債券、貨幣市場證券及/或其他投資工具，包括衍生工具。
- 您在此等基金的投資有可能大幅虧損。
- 此等基金涉及投資於較為波動的新興市場有關的風險。
- 此等基金涉及投資於單一市場或行業有關的風險。
- 此等基金可投資於非投資級別債券，此等債券的信貸及流動性風險較高。
- 此等基金可投資於衍生工具及/或結構性投資產品。此類投資可能包含額外風險。部份衍生工具及結構性產品附帶槓桿作用，可能間接導致有關工具及投資於該等工具/產品的基金有較大的波動。
- 在投資前，請細閱此基金的認購章程(包括潛在風險的資料)，並不要只依賴此文件內之資料而作出投資決定。
- 投資乃是閣下的個人決定。您在投資前應確定中介人已向您解釋此等基金是否適合閣下。

The fund aims to generate long-term capital growth through investing primarily in securities of companies having their head office or exercising a predominant part of their activity in less developed countries of Central, Eastern and Southern Europe (including Russia), Middle East and Africa that are considered as emerging markets according to the MSCI EM Europe, Middle East and Africa Index.

本基金旨在透過首要投資於總公司設於摩根士丹利新興歐洲、中東及非洲指數所述新興市場，即歐洲中部、東部和南部(包括俄羅斯)、中東及非洲等發展中國家，或在這些地區經營主要業務的企業證券，以締造長線資本增長。

The benchmark for performance is the MSCI Emerging EMEA Index (with the stock position capped at 5%).

基金表現以摩根士丹利新興歐洲、中東及非洲指數(股份上限為5%)為比較基準。

* Due to rounding, the total of Geographical Breakdown & Industry Breakdown may not be equal to 100%.
由於是進位數，國家投資分佈及行業投資分佈的總額可能不相等於100%。

Volatility Measures 波動衡量

Relative Volatility 相對波動	-
Beta	-
R ²	-

Volatility measures are not calculated for funds which are less than 3 years old. 成立不足三年的基金之波動不會被計算。

* Acc represents share class with dividends accumulated.
Acc 代表股息累積的股份。

Investment Style 投資策略

The fund manager is a bottom-up stock picker who takes a value-based approach and actively seeks opportunities to invest in undervalued, unloved companies that have the potential to deliver solid returns for long-term investors. The manager will look to buy cheap stocks on low PE multiples and avoid chasing momentum or stocks that are currently fashionable. Companies in which the manager will look to invest will typically have one or more of the following characteristics: a strong franchise; robust free cash flow generation; low enterprise value to sales; high dividend yields; low price-to-book; and low price-to-earnings. The manager is looking to purchase stocks at a significant discount to their intrinsic values, and the EMEA region provides a rich hunting ground for stocks with these characteristics.

The manager has a long 'payback' horizon to identify structural or regime changes as far as four to five years in the future. The manager will look to own quality stocks, which may be overlooked or unloved by investors because they lack a short-term catalyst, with the view that he is prepared to buy and wait for something to happen. The manager will not be swayed by short-term factors, but is sensitive to excessive price appreciation.

To generate bottom-up ideas, the manager will utilise Fidelity's extensive research resources. The manager has been instrumental in establishing the EMEA research team based at FIL's London offices. This consists of six EMEA-dedicated research analysts that are aligned across industry sectors. This bottom-up approach is augmented by the use of quantitative value-based screens, such as Bloomberg, Holt and Quest, to assist in the process of identification and selection of investments. Furthermore, as an absolute return investor, the manager will set target prices for each holding in the fund and monitor 'sell' target screens to prompt exit when price targets are reached.

基金經理奉行「由下而上」的選股方式，採取「價值型」投資策略，積極發掘價值被低估和備受忽視，但可望為長線投資者提供穩健回報的公司。基金經理將同購買入市盈率偏低的股份，避免追求當時流行的趨勢或股份。基金經理有意投資的公司一般具備下列一項或以上特點：擁有優秀的專利權、產生強勁自由現金流的能力、企業價值與銷售比率偏低、高股息收益，以及市賬率及市盈率偏低。此外，基金經理致力買入較內在價值提供大幅折讓的股份，而歐非中東地區可提供更多機會，投資於具備上述特點的股份。基金經理採取較長的「回報」期，以鑑別未來四至五年的結構或政策制。基金經理將致力持有因欠缺短期刺激因素而被投資者忽略或不受追捧的優質股票，並在買進後耐心等待，不會受短期因素所影響，但將密切留意過份的價格升值。

基金經理將運用富達的全面研究資源，提供「由下而上」的選股意見。駐FIL倫敦辦事處的歐非中東研究團隊為基金經理提供協助，團隊由六名歐非中東的專員研究分析員組成，各自負責特定的領域。我們採用量化的價值篩選，例如彭博、Holt和Quest，協助鑑別和篩選投資。強化「由下而上」的投資取向。此外，作為絕對回報投資者，基金經理對基金的每項投資設定目標價，並監察「沽售」目標，以便在到達目標價時及時沽售離場。

Relative Volatility - Calculated by comparing the standard deviation of a fund's monthly returns to that of the appropriate benchmark index. Values greater than 1 show that fund returns have been more divergent than the benchmark whereas values of less than 1 show them to have been less divergent. Beta - Beta measures a fund's risk relative to its market based on the historic tendency of monthly fund returns to be greater or less than the equivalent benchmark returns. A Beta value of greater than 1 indicates a tendency for the fund to move more than the benchmark over a particular period - a value of less than 1 indicates a tendency to move less. R² - This represents the degree to which fund movements are attributable to the market. The maximum value is 1, indicating that the fund exactly followed movements of the benchmark. Progressively lower values indicate proportionately greater independence of fund returns compared to benchmark returns.

相對波動 - 計算方法為將基金每月回報的標準差與適用基準指數的標準差作比較。若計算所得值大過1，表示基金回報較指數回報的波動為大，若小於1，則表示基金回報較指數回報的波動為小。Beta - 根據歷來每月基金回報趨向高於或低於有關基準指數回報的趨勢，量度基金相對其市場的風險程度。Beta值大過1表示在某一期內，基金的波幅趨向大於基準指數，若小於1，則表示基金的波幅趨向小於基準指數。R² - 代表由市場所引致的基金波幅之程度。最大值為1，表示基金表現與基準指數的走勢一致。R²值逐步降低表示基金回報較比例逐漸離離基準指數回報。

In general fluctuation in the performance of emerging markets is normally higher as it tends to be more volatile than other developed markets. 新興市場比一般已發展市場較波動，因而其表現亦較為反覆。
